

6x6 Gigantic 36 TV Wall
Managed by our SB-Touch System

TV Walls

What can you do with a Multi-Screen TV Wall setup? One of the most common scenarios is for sports watching. Having several games playing on the wall at once, or one big game stretched across a multitude of TVs (especially on very large screens) is a sports fan's dream.

CAT5 HDMI Matrix System

Our most popular system is our, HDMI HD 1080p Video over Cat5 wiring system which includes the SB-Touch v2 Controller and all interconnect cables (except the Cat5 to the TV's). The basic system is 8 sources to 16 TVs and can be scaled to any size by adding more receivers, source converters or additional switches (each switch supports 48 additional ports). Audio is delivered to each TV and zoned audio is also available.

COAX HDMI HDTV Systems

Our Coax HDMI HD Multi TV Control System has all the features of our popular Cat5 system but uses a single coax wire as the medium between the unit and TVs, it distributes raw uncompressed video for the absolute best picture possible. Coax is also the preferred choice if you already have wires run from an older Component or RF install. While this system runs approximately 30% more than our Cat5 system the extra cost is offset by being able to re-use your older wiring, 1080p or 3D.

On Screen Signage Systems

SportsBar-TV Systems is now proud to announce our exclusive inexpensive solution to adding Text and Graphics overlaid with the programing on your TV's. The TV your patron is currently watching is the optimal place to put announcements or advertising!

Audio Systems

We offer zoned audio (Bar, Dining, Restrooms, Patio, etc). Using our SB-Touch controller and an additional audio switch or multi-zone system, audio control is as easy as the Video control. With our "Audio to Zone" feature, all you have to do is pick a TV and touch one button to make your preferred zone play that TV's audio.
